

QR Code Generators Online

Thanks to - <http://2d-code.co.uk/qr-code-generators/> for the blog post on the following QR Code Generators.

There are quite a few QR Code generators online. Some of them like Barcode Maker simply cosmeticize the Google Chart API while others like ZXing have full MECARD encoding. Here are the best examples:

[QR Code and 2D Code Generator](#)

Kerem Erkan has produced an excellent QR Code, Micro QR Code, Datamatrix and Aztec Code generator with many interesting features including URL shortening.

[QR Generator](#)

Configure size, version, error correction etc., and save as PNG, TIFF, JPEG, GIF, XAML, SVG, EPS or all in a ZIP file.

[Maestro](#)

Create QR Codes for telephone, SMS, Maps, URL, MeCards and Raw data.

[Jason Delpont's Create QR Code](#)

User interface for the Google Chart API with 500px x 500px maximum size.

[BeQRious](#)

50px x 50px images can be inserted in the code and output can be saved as gif or pdf.

[i-nigma](#)

Foreign language versions available in [Español](#), [Português](#) and [Italiano](#).

[Invx](#)

One size but generates a QR Code and a Datamatrix Code simultaneously.

[Jaxo](#)

Select encoding mode, multiple colors and upload background graphic.

[Kaywa](#)

Generates small, medium, large and extra-large sizes.

[Goqr.me](#)

Any color background or modules and many other options.

[Nokia](#)

Includes full [VCARD](#) implementation.

[QRcreate & Track](#)

Includes iCalendar and vCard formats and an option for real-time reporting.

[QR Stuff](#)

Lots of options here including color, batch printing with Avery label compatibility and send by email.

[Raco](#)

Can specify error correction levels.

[SnapMaze](#)

One size but choice of six colors.

[Winksite](#)

PNG and JPG in standard sizes.

[ZXing](#)

Includes encoding in [MECARD](#) format.

[Decoder/Encoder](#)

Stand alone Decoder and Encoder

The only known online **Micro** QR Code Generators are [Kerem Erkan's](#) and [TEC-IT](#).
